

Work scheduled to begin Monday on portion of FM 989 in Texarkana

As part of the ongoing I-30 construction work, crews are scheduled to begin work to widen a portion of FM 989/Kings Highway starting this Monday, December 11. Work will take place from the I-30 north frontage road to Gibson Lane.

During this work, traffic will be limited to one-lane and will be controlled by flagger operations. Crews are expected to work during daytime hours and have the roadway opened to two-way traffic at the end of the day. Immediate work will include replacing and extending cross culvert structures under the existing roadway. Later, crews will widen the roadway, which will also require lane closures.

Travelers in this area are advised to watch for road crews, expect delays and plan their commutes in advance while the work progresses. This work is subject to weather conditions and other unforeseen circumstances.

This traffic move does not affect the current I-30 main lane traffic configurations.
